

Tracy is a human resources assistant. She would like to vote this upcoming election but not sure how to do it safely.

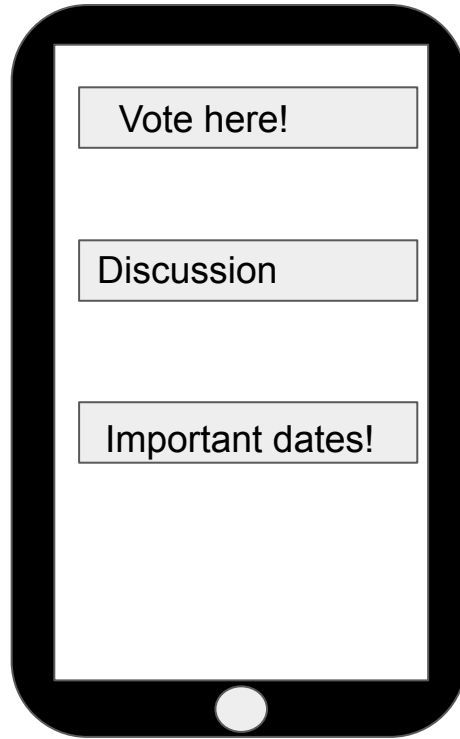

Tracy tried to ask her co-worker but they can't give her clear instructions on how to vote safely and quickly.

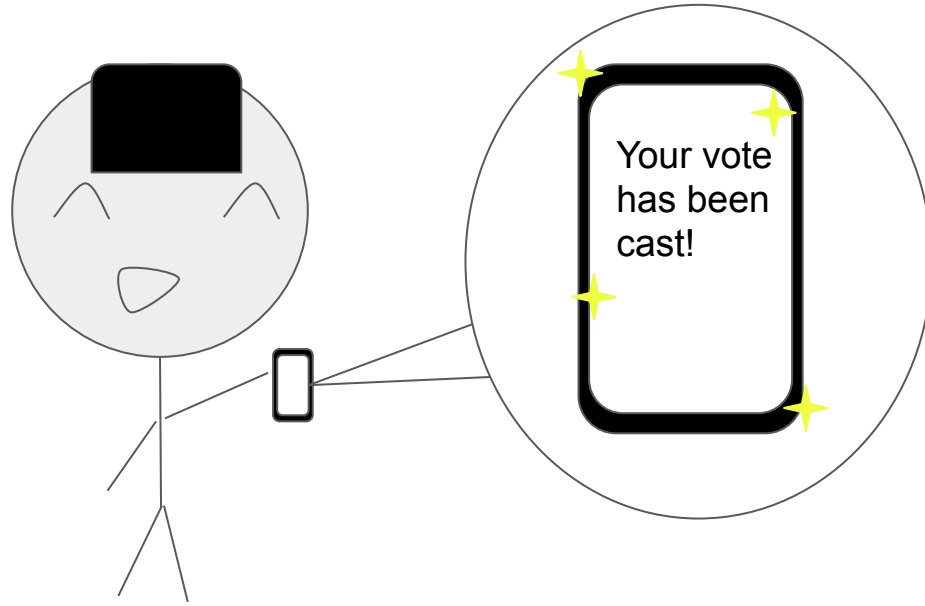

That's when Tracy tried Google. It was just too complicated. Just wall of texts. She wanted something safe and simple.

That's when Tracy came across the voting app through social media on her phone that met all her needs.

The app got easy vote button, allows her to discuss it with other people and reminds me of important dates!

Tracy is now happy because she got to vote quickly and safely through her phone without any hassle.
